PRODUCT OVERVIEW

APEX

Inspironics Apex — one front door to your organisation's knowledge

Prepared 13 November 2026 · Inspironics

1. Product Name

Apex — Inspironics Apex

Apex is a self-hosted platform from Inspironics that brings three products behind one front door: the **Innovation Showcase** for solution blueprints, **SlidesVault** for presentations, and **Inspironics Academia**, which turns engineering playbooks into courses, tests and verifiable certificates. People sign in once, see which products are ready, and move between them at one address, while every file stays in the organisation's own Dropbox.

2. Features & Benefits

Each product keeps its own data and session; Apex joins them so they work as one.

Feature	What it does	Customer benefit
Apex Front Door GATEWAY	One sign-in and one sign-out for every product, with each product's session kept separate	No more separate logins or forgotten sessions
Live Status Dashboard GATEWAY	Product cards showing Ready, Starting or Offline, live totals and recent sync activity	People know what is available before they click
Cross-product Search GATEWAY	One search box for platforms, pages, presentations and courses	Find anything without knowing where it lives
Innovation Showcase SHOWCASE	Curated gallery of 235 solution blueprints with search, filters, lightbox and Daily Spotlight	The portfolio is always ready to present
3D Ecosystem Explorer SHOWCASE	Explorable 3D model of industry zones and the sense–connect–model–decide stack, linked to the gallery	A memorable way for clients to explore the offer

Feature	What it does	Customer benefit
Deck Library & Viewer SLIDESVAULT	Ranked search, domain and tag filters, in-app viewer with page bookmarks and related decks	The right deck in seconds
Offline Reading SLIDESVAULT	Installable web app; saved decks open without a connection and are cleared at sign-out	Present anywhere, even without a network
Playbook to Course ACADEMIA	Playbooks become modules and lessons traced to their source chapters; AI drafts content, a quality check flags weak lessons, people approve	Courses in days instead of months, with nothing unreviewed
Tests & Certificates ACADEMIA	Lesson quizzes, chapter tests and final tests graded on the server; certificates with a public verification link	Results and certificates that can be trusted
Retention & Recertification ACADEMIA	Spaced-repetition flashcards; re-certification when a playbook changes materially or a certificate expires	Knowledge stays current as practice changes
Meetings to Actions ACADEMIA	Teams, VTT or text transcripts become decisions, owned action items with reminders, and slide briefings	Meetings that move work forward
AI Studio & Spend Controls ACADEMIA	Content, voice-over and narrated slide videos, with daily, monthly and render limits checked before each paid call	AI output with a predictable bill
Analytics & Reports ALL PRODUCTS	Views, downloads and reading time; monthly PDF report; completion dashboards; compliance CSV export	See what people actually use and learn
Dropbox-native, Self-hosted PLATFORM	Files stay in Dropbox and are fetched only by Apex's servers with encrypted tokens; runs on the organisation's own machine	Your storage, your servers, no new file silo

3. Competitor Comparison

Apex competes with tools that each cover one part of what it does; teams today typically combine three or four of them.

Capability	Apex	Sales-content hubs Showpad, Seismic, Highspot	Employee intranets SharePoint, Unily, Staffbase	Brand asset libraries Bynder, Brandfolder, Frontify	Learning platforms Docebo, TalentLMS, 360Learning
One sign-in across several apps	Yes	No	Yes	No	No

Capability	Apex	Sales-content hubs Showpad, Seismic, Highspot	Employee intranets SharePoint, Unily, Staffbase	Brand asset libraries Bynder, Brandfolder, Frontify	Learning platforms Docebo, TalentLMS, 360Learning
Presentation library and viewer	Yes	Yes	Limited	Limited	No
Innovation / solution showcase	Yes	Limited	Limited	Yes	No
Playbook-to-course with AI drafting	Yes	Coaching content	No	No	Yes
Server-graded tests and verifiable certificates	Yes	Limited	No	No	Yes
Re-certification when the source changes	Yes	No	No	No	Time-based
Meetings to action items	Yes	No	No	No	No
Dropbox stays the source of truth	Yes	Connector	Connector	Connector	No
Self-hosted, light footprint	Yes	No	Limited (SharePoint Server)	No	No
Native mobile apps and CRM integrations	No	Yes	Yes	Limited	Yes

Competitor entries reflect the general positioning of each category and should be checked against each vendor's current offering before external use. Apex's Dropbox connection has been tested against a simulated Dropbox; the first live sync is pending.

4. Unique Selling Points

1. **Three products, one front door.** A showcase, a deck library and an academy behind one sign-in and one sign-out, at one address, with live status for each. Point tools keep these apart.
2. **Playbooks become certified skills.** Playbook to course to test to certificate in one flow, with re-certification triggered when the playbook itself changes.
3. **Tests learners cannot game.** Every quiz and test is graded on the server, answers never reach the browser, and anyone can verify a certificate from its link.
4. **Your files stay in your Dropbox.** Apex's servers fetch and check every file; the browser never contacts Dropbox, and access tokens are encrypted.

5. **AI drafts, people decide.** AI is optional and budget-capped; generated lessons pass an automatic quality check and a human approval before learners see them.

6. **Light and self-hosted.** A zero-dependency gateway starts the whole stack with one command and stays closed to the network unless opened on purpose.

7. **Tested before it ships.** 567 automated tests, server-side access checks on every change, and zero open dependency advisories.

5. Project Price

Apex is sold as a subscription per organisation, self-hosted, plus a one-time onboarding fee.

Plan	Intended for	Included users	Indicative price (USD)
Team	One department or a small innovation team	Up to 25	**$750 / month**
Business	Organisations rolling out playbooks and certification	Up to 150	**$2,000 / month**
Enterprise	Large or multi-site organisations (custom quote)	Unlimited	**From $5,000 / month**
Onboarding (one-time)	Installation, Dropbox connection, playbook import, training	—	**$4,000 – $12,000**

Annual billing at a 15% discount is suggested.

> **Indicative pricing.** These figures are a proposal and have not been approved by Inspironics. No prices exist in the Apex project files; confirm them with Inspironics management before submission.
