PRODUCT OVERVIEW

# IVEOS

Inspironics Valuation and Execution OS

Prepared 12 November 2026 · Inspironics

## 1. Product Name

**IVEOS — Inspironics Valuation and Execution OS**

IVEOS is a corporate activity operating system offered by Inspironics as a subscription-based, multi-tenant SaaS. It brings valuation, project execution (PMO), governance, risk, financials, a secure data room and a CEO portal into one evidence-driven platform, so leadership sees one consistent version of the company instead of disconnected spreadsheets and tools.

## 2. Features & Benefits

Every module reads from the same governed data, so a change in one place (for example, a slipped project or a revised budget) shows up everywhere it matters.

| Feature | What it does | Customer benefit |
|---|---|---|
| **CEO Portal** | CEO-only overview of readiness, valuation, cashflow, cap table, board, execution, assumptions and evidence, fed from the PMO module | One trusted executive view without chasing teams for status |
| **PMO & Execution** | Portfolios, projects, workstreams, milestones, sprints, dependencies, change requests, interactive timeline and kanban | Delivery status is live and visible across the organization |
| **Valuation** | DCF and ARR-multiple valuation, scenarios, assumptions, exit waterfall; calculated from manually entered cost and budget | Defensible, repeatable valuation that updates as the business changes |
| **Financials** | Monthly actuals, customer concentration, renewals, weighted pipeline, ROI and payback | Clear financial position for planning and fundraising |
| **Governance** | Decisions, approvals, policies, evidence gates, statements and question threads | Decisions are recorded with who, when, why and on what evidence |
| **Risk** | Risk registers, controls and risk scoring | Risks are tracked and scored consistently, not lost in emails |
| **Secure Data Room** | Encrypted document storage, CEO-controlled password, time-limited access, full access history | Investor and due-diligence readiness with controlled disclosure |
| **Workbook Ingestion** | Upload Excel templates; every row is validated and compared before approval; comments and flags on any row | Existing spreadsheets come in safely, without bad data overwriting good data |
| **AI Assist (Gemini)** | Helps fill new-data forms and categorize information; AI-guided onboarding interviews new organizations | Faster setup and data entry with less manual effort |
| **Ask IVEOS** | Answers questions from the company's own records, citing the source records | Quick answers that can be checked, with no invented figures |

| Feature | What it does | Customer benefit |
|---|---|---|
| **Briefings** | Compose and present board and leadership briefings from live data | Board packs in minutes instead of days |
| **Personas & Organizations** | CEO, CFO, PMO and other roles, plus Partners, Brokers and Consultants from other organizations | Each person sees what they need; external parties see only what is shared |
| **Audit & Activity** | Every change is logged; nothing is ever deleted, only retired | Complete history for auditors, investors and the board |
| **Multi-tenant SaaS** | Inspironics provisions each customer organization, which then invites its own staff | Quick onboarding with each customer's data kept separate |

## 3. Competitor Comparison

IVEOS competes with tools that each cover one slice of what it does; customers today typically combine four or five of them.

| Capability | IVEOS | Work / project mgmt Monday.com, Asana, Smartsheet | FP&A / planning Anaplan, Pigment, Cube | Cap table & valuation Carta | Data rooms Datasite, Intralinks | Board & GRC Diligent, AuditBoard |
|---|---|---|---|---|---|---|
| **Projects / PMO** | Yes | Yes | No | No | No | Limited |
| **Financials and budgets** | Yes | Limited | Yes | Limited | No | No |
| **Company valuation (DCF, ARR, exit)** | Yes | No | Custom models | Yes (409A focus) | No | No |
| **Governance, decisions, approvals** | Yes | Limited | No | No | No | Yes |
| **Risk register and scoring** | Yes | Limited | No | No | No | Yes |
| **Secure data room** | Yes | No | No | Limited | Yes | Limited |
| **Single CEO / board view of all of the above** | Yes | No | No | No | No | Partial |
| **External partners, brokers, consultants with scoped access** | Yes | Guest access | Limited | Limited | Yes | Limited |
| **Evidence and full audit trail on every change** | Yes | Partial | Partial | Partial | Yes (documents) | Yes |

Competitor entries reflect the general positioning of each category and should be checked against each vendor's current offering before external use.

## 4. Unique Selling Points

1. **Execution linked to valuation.** IVEOS connects day-to-day project delivery, costs and budgets directly to company valuation, so leaders see how execution moves enterprise value. Point tools keep these apart.
2. **One platform instead of five.** PMO, financials, valuation, governance, risk, data room and the CEO portal share one data model, which removes reconciliation between tools.
3. **Evidence-driven and audit-ready.** Every figure carries its source, every change is logged, and nothing is ever deleted. Corrections must cite evidence, which builds trust with boards and investors.

4. **Built for the CEO and board.** A dedicated CEO portal and presentation-ready briefings turn live data into board material without manual packs.
5. **Cross-organization collaboration.** Partners, brokers and consultants from other organizations join with access limited to what is shared with them.
6. **Trustworthy AI.** Gemini-powered AI Assist speeds up onboarding and data entry, while Ask IVEOS answers only from the company's own records and cites them.
7. **Enterprise-grade security.** Each customer's data is isolated at database level, money is calculated with exact arithmetic, and the data room is encrypted with CEO-only password control.

## 5. Project Price

IVEOS is sold as a subscription per customer organization, plus a one-time onboarding fee.

| Plan | Intended for | Included users | Indicative price (USD) |
|---|---|---|---|
| **Starter** | Startups and small leadership teams | Up to 10 | **$1,500 / month** |
| **Growth** | Scaling companies preparing to raise or exit | Up to 50, plus external partners | **$4,000 / month** |
| **Enterprise** | Larger or multi-entity organizations | Unlimited | **From $9,000 / month** |
| **Onboarding (one-time)** | Setup, workbook import, AI-guided onboarding, training | — | **$5,000 – $15,000** |

Annual billing at a 15% discount is suggested.

> **Indicative pricing.** These figures are a proposal and have not yet been approved by Inspironics. Confirm them against the Inspironics Dev Cost Sizing and DevCost + SaaS ROI workbooks before submission.
